MTD220

End-of-Course Assessment - January Semester 2026

User Experience (UX) Design and Web Technologies

INSTRUCTIONS TO STUDENTS:

1. This End-of-Course Assessment paper comprises **FIVE (5)** pages (including the cover page).

2. You are to include the following particulars in your submission: Course Code, Title of the ECA, SUSS PI No., Your Name, and Submission Date.

3. Late submission will be subjected to the marks deduction scheme. Please refer to the Student Handbook for details.

IMPORTANT NOTE

ECA Submission Deadline: Friday, 06 March 2026 12:00 pm

ECA Submission Guidelines

Please follow the submission instructions stated below:

Please Read This Information before You Start Working on your ECA
This ECA carries 70% of the course marks and is a compulsory component. It is to be done individually and not collaboratively with other students.

Submission
You are to submit the ECA assignment in exactly the same manner as your tutor marked assignments (TMA), i.e. using Canvas. Submission in any other manner like hardcopy or any other means will not be accepted.
Electronic transmission is not immediate. It is possible that the network traffic may be particularly heavy on the cut-off date and connections to the system cannot be guaranteed. Hence, you are advised to submit your assignment the day before the cut off date in order to make sure that the submission is accepted and in good time.
Once you have submitted your ECA assignment, the status is displayed on the computer screen. You will only receive a successful assignment submission message if you had applied for the e-mail notification option.

ECA Marks Deduction Scheme
Please note the following:
a) Submission Cut-off Time – Unless otherwise advised, the cut-off time for ECA submission will be at ***12:00 noon*** *on the day of the deadline. All submission timings will be based on the time recorded by Canvas.*
b) Start Time for Deduction – Students are given a grace period of 12 hours. Hence calculation of late submissions of ECAs will begin at ***00:00 hrs*** *the following day (this applies even if it is a holiday or weekend) after the deadline.*
c) How the Scheme Works – From 00:00 hrs the following day after the deadline, ***10 marks*** *will be deducted for each* ***24-hour block****. Submissions that are subject to more than 50 marks deduction will be assigned* ***zero mark****. For examples on how the scheme works, please refer to Section 5.2 Para 1.7.3 of the Student Handbook.*
Any extra files, missing appendices or corrections received after the cut-off date will also not be considered in the grading of your ECA assignment.

Plagiarism and Collusion
Plagiarism and collusion are forms of cheating and are not acceptable in any form of a student's work, including this ECA assignment. You can avoid plagiarism by giving appropriate references when you use some other people's ideas, words or pictures (including diagrams). Refer to the American Psychological Association (APA) Manual if you need reminding about quoting and referencing. You can avoid collusion by ensuring that your submission is based on your own individual effort. The electronic submission of your ECA assignment will be screened through a plagiarism detecting software. For more information about plagiarism and cheating, you should refer to the Student Handbook. SUSS takes a tough stance against plagiarism and collusion. Serious cases will normally result in the student being referred to SUSS's Student Disciplinary Group. For other cases, significant marking penalties or expulsion from the course will be imposed.

Answer all questions. (Total: 100 marks)

Question 1

Project Assignment
The goal of the Project is to test the design thinking theory and related creation and development skills for user experience design in the course MTD220. You need to consider the project as the playground to apply and exercise the principles of design stacks, UXD, and JS/HTML/CSS development knowledge that you learned through the course.

This question's task is to design, wireframe, create, and develop a micro-site. The metrics of marks is described in the following Table 1 regarding this assignment.

Project Specifications
This ECA Project requires you to create a website for job application that introduces yourself, educational background, extra-curricular activities and personal interests. There should be a form for potential employers to contact you with the selection of available interview time slots. Perform your research on other websites with references and provide insights based on Jakob 10 Heuristics with examples of responsive web design (RWD). State the good aspects from their designs to learn and combine in your own website design. A **THREE (3)** page report should be submitted documenting the processes through conceptualising, designing and developing with the skills learned in the course and your personal experiences.

Your website must meet the following criteria:

1. Develop and implement your website with Bootstrap as framework.
2. Ensure the website consists of **FOUR (4)** pages in total.
   - **Homepage** – leave a good first impression to attract your audience
   - **Sub-page 1** – demonstrate the implementation of design thinking in detail by creating your website as a practical case study
   - **Sub-page 2** – apply bootstrap skills to build up detailed content for your self-introduction with suitable and consistent styles
   - **Sub-page 3** – develop relevant content to illustrate your HTML/CSS/JS skills, enhanced design thinking, and user experience in your website
3. Implement RWD to the following screen sizes which must be satisfied by all webpages:
   a. <576px
   b. ≥576px <992px
   c. ≥992px

Your report (in Times – font size 12 with optional tables or charts) should cover the following areas:

i. Describe the target audience, goals, user flows and experience of your website.
ii. Provide insights on your understanding and process details of applying design thinking into the website design.

MTD220 Copyright © 2026 Singapore University of Social Sciences (SUSS)

iii. Briefly explain the client-side technologies implemented in your website. Provide suggestions of potential server-side technologies to enhance your website without actual development.

iv. Appraise and analyse the differences of usability for each stated screen size to potential devices.

Marks Distribution

The Marking Scheme for ECA is shown below:

Table 1

Area of Assessment	**Maximum Marks**
Functionalities (features and elements)	15
Usability (Jakob 10 Heuristics)	15
Technical Complexity of Website	10
Engagement and Appeal of Website	10
Complexity and Appeal of Form Component	10
Complexity and Appeal of Design and UX	10
Responsive Webpages (RWD)	10
Originality and Creativity	10
Website Development Report	10
Total	**100**

(100 marks)

Appendix

ECA Submission Guidelines

Archive all your solutions into a single zip file (saved as MTD220_ECA_yourname.zip).

Submit the zip file through Canvas under 'ECA' on or before the cut-off date shown above.

Ensure that you adhere to the **file size limit of 150 Mb**. Your submission may be rejected/truncated if it exceeds the specified limit of 150 Mb.

You are also required to submit your report (Word document) through Canvas under 'ECA Report' on or before the cut-off date shown above. You are to include the following particulars in the report: Course Code, Title of the ECA, SUSS PI No., Your Name, and Submission Date.
